

# Java To-Do List App

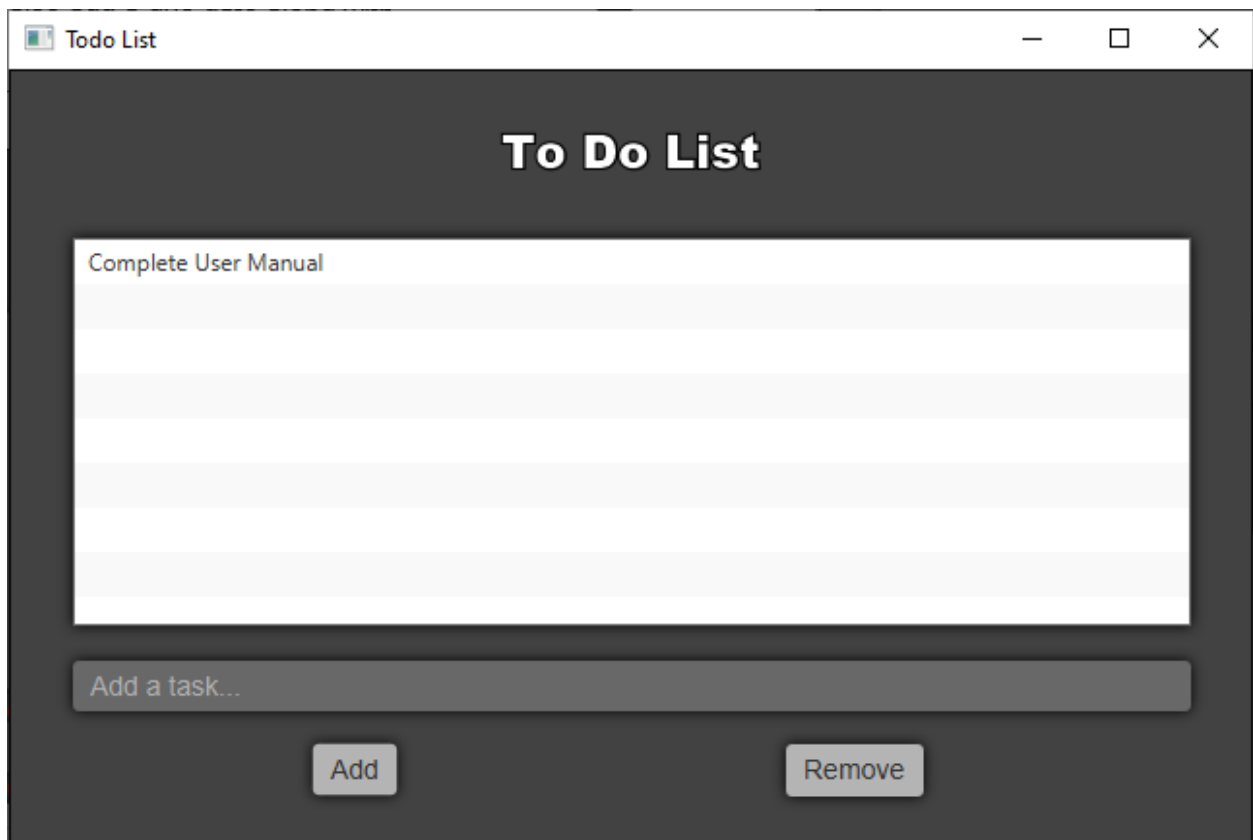

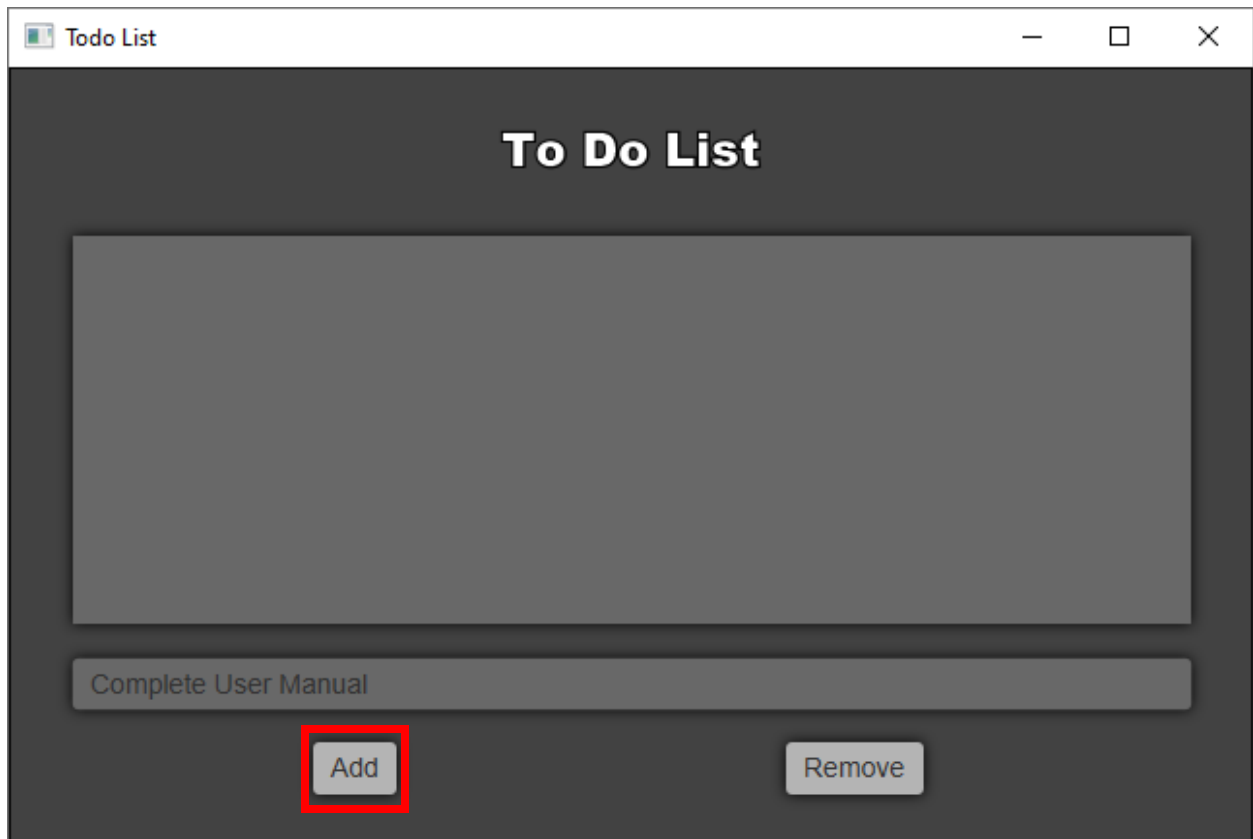

By Logan Pizzurro

## Adding an item

To add an item, first type the name of the task you would like to add in the input field. The name of the task can include numbers, so it is recommended to also add a due date along with the name of the task.

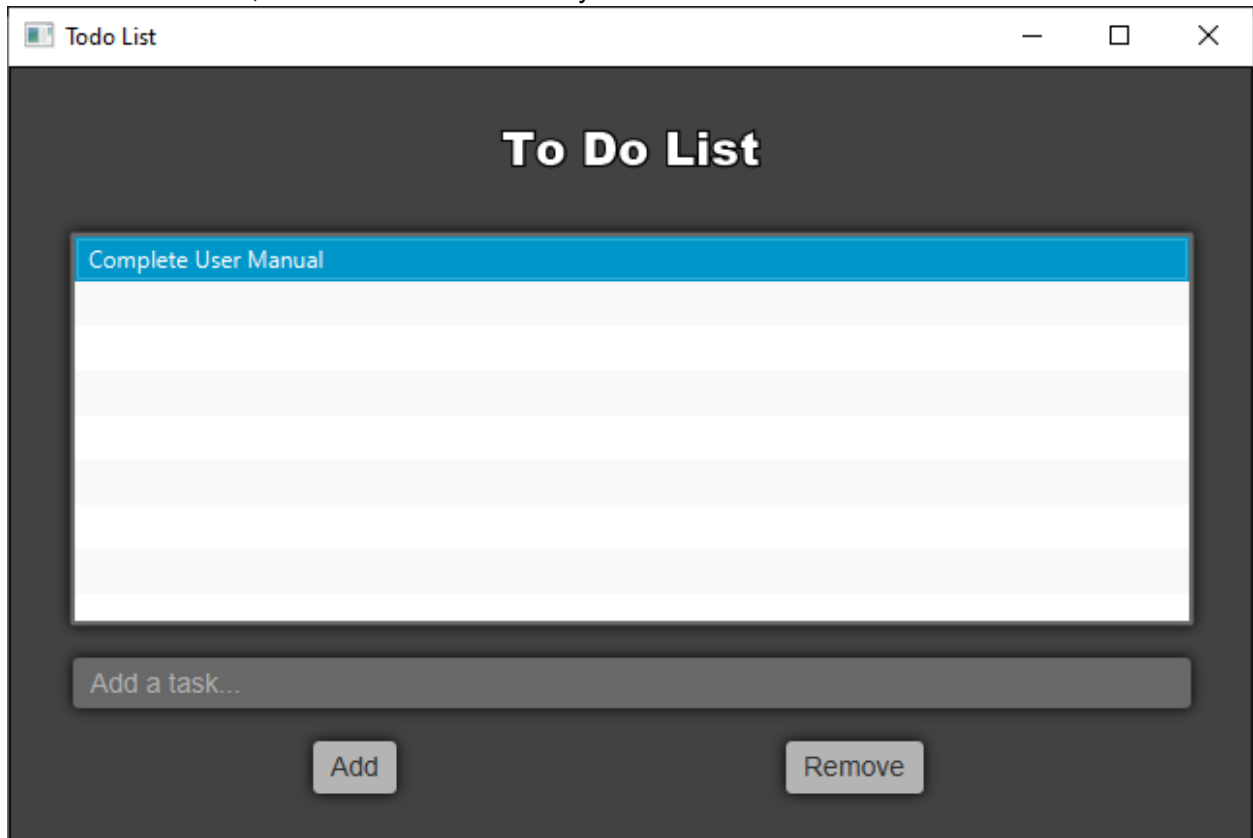

A screenshot of a Java application window titled "Todo List". The window has a dark gray background. At the top, the title "To Do List" is displayed in white. Below the title is a large, empty gray rectangular area representing the task list. At the bottom of the window, there is a text input field containing the text "Complete User Manual". This input field is highlighted with a red rectangular border. Below the input field are two buttons: "Add" and "Remove".

After typing the name of the task, click the "Add" button. This will add the task to the list above.

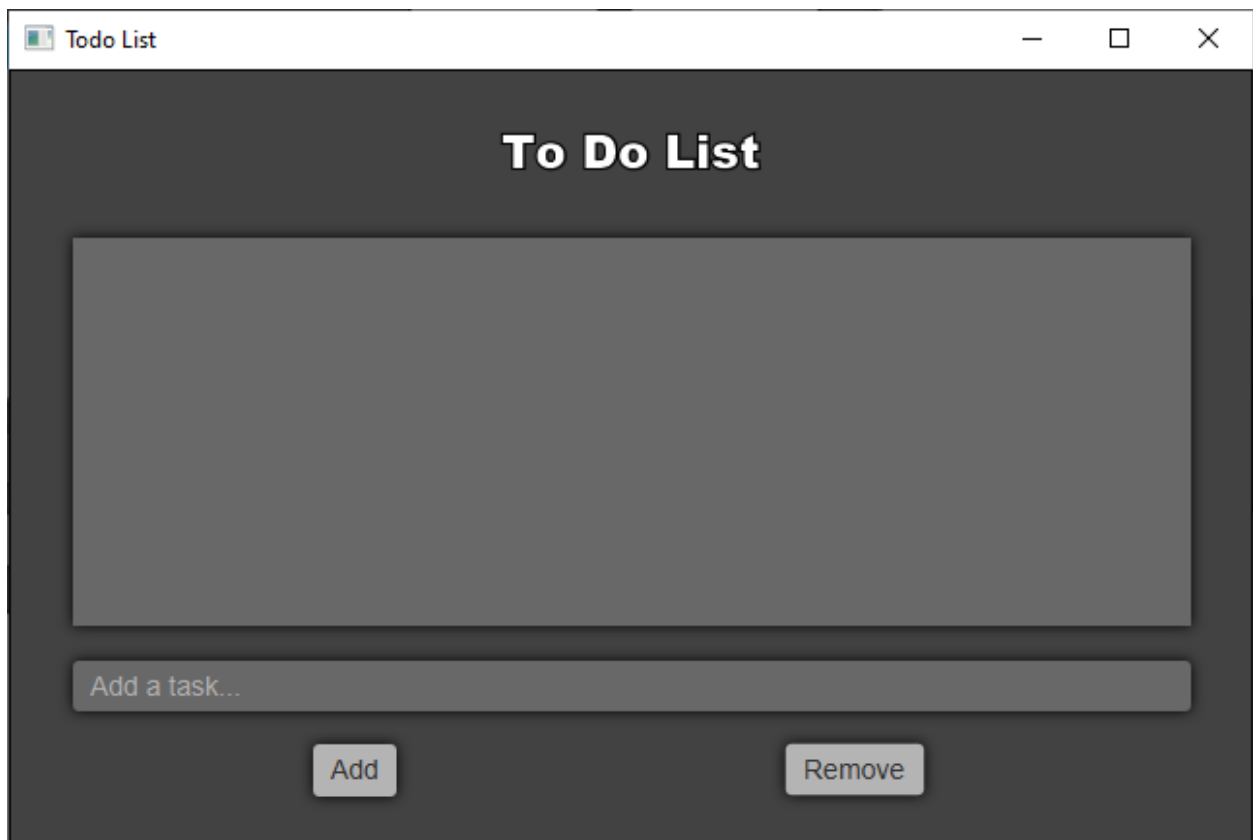

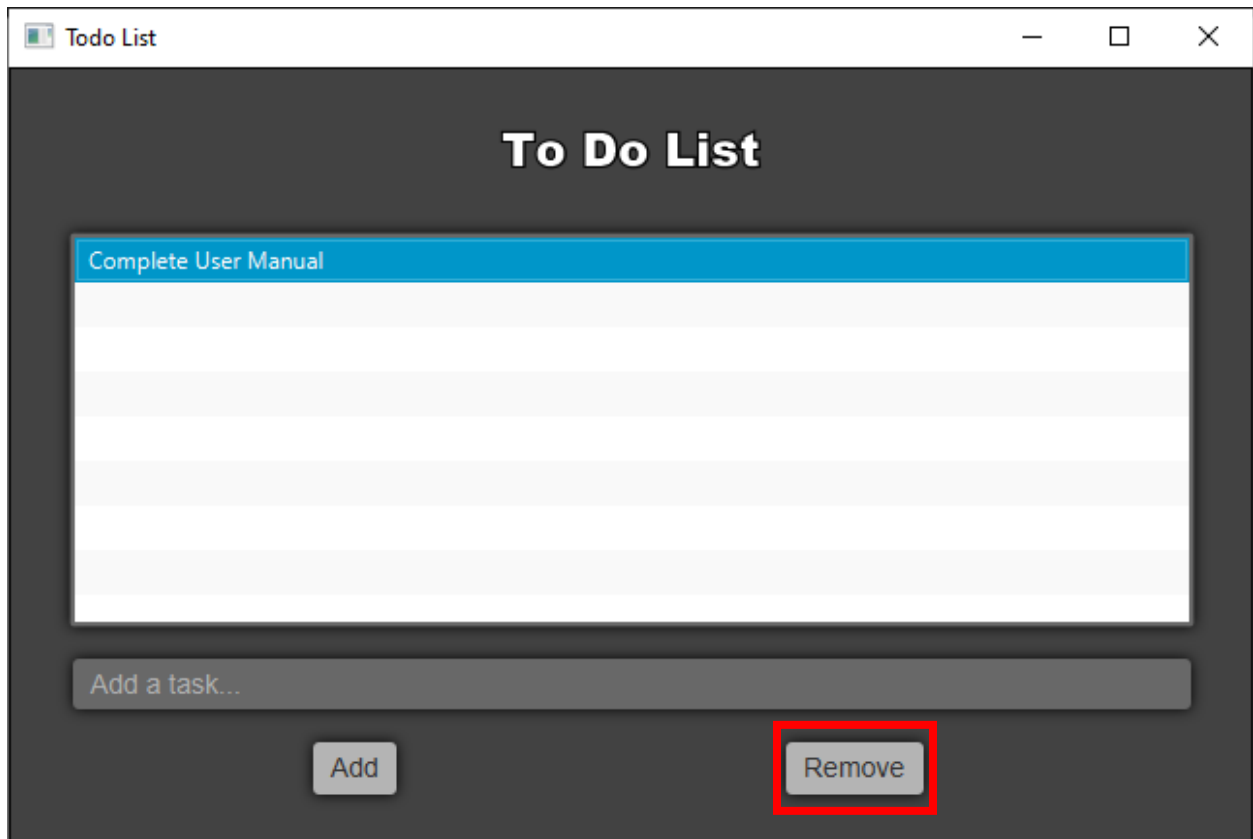

## Removing an Item

To remove an item, first select the item that you would like to remove.

Secondly, click on the remove button.

## **Tips**

You can hover over any element with your mouse cursor. This will make a tooltip appear on the element you are hovering over. These tooltips can help you if you are stuck.
